Managing Board and one Representative from each Departmental Society

The Engineer

Who is the man designs our pumps with judgment, skill and care?

Who is the man that builds 'em and who keeps them in repair?

Who has to shut them down because the valve seats disappear?

The bearing-wearing, gearing-tearing mechanical engineer!

Who buys his juice for half a cent and wants to charge a dime?

Who when we've signed the contract, can't deliver half the time?

Who thinks a loss of twenty-six per cent is nothing queer? The volt-inducing, load-reducing electrical engineer!

Who is it takes a transit out to find a sewer to tap?

Who then with care extreme locates the junction on the map?

Who is it goes to dig it up and finds it nowhere near?

The mudbespattered, torn and tattered civil engineer!

Who thinks without his product we would be in the lurch?

Who has a heathen idol which he designates Research?

Who tints the creeks, perfumes the air, and makes the landscape drear?

The stink-evolving, grass-dissolving chemical engineer!

Who builds a road for fifty years that disappears in two?

Then changes his identity, so no one's left to sue?

Who covers all the traveled roads with filthy, oily, smear?

The bump-providing, rough-on-riding highway engineer!

Who is the man who'll draw a plan for anything you desire?

From a transatlantic liner to a hairpin made of wire?

What "ifs" and "ans," "however," and "buts" who makes his meaning clear?

The work-disdaining, fee-retaining consulting engineer!

Who takes the pleasure out of life and makes existence hell?

Who'll fire the real good-looking one because she cannot spell?

Who substitutes a dictaphone for a coral-tinted ear?

The penny-chasing, dollar-wasting industrial engineer!

—Thanks to "Chief" Younger.

So Long Seniors

Now we come to the year's end, scholastically speaking. Before final examinations are fairly over, trunks will be packed and the big march homeward will be on. It will be the last parting for a great many seniors. That is the sad part of it all. A great bunch is moving on this year, a group that has left its mark here on the campus. A lot of leadership is now heading outward for the last time. And, more than that, is the loss in general good fellowship. So, here's wishing you the best of luck, Seniors! It has been a privilege to know you and to work with you. Don't forget, we will be anxious to hear from you and to learn where you are and what you're doing. Drop us a line, now and then, for the Alumni News. And don't forget, when Homecoming time comes, "We'll be seeing you."

Goodbye and Hello

With this issue the fate and fortune of the Engineer is transferred to new hands. A void is left by the graduating members of the staff that will be hard to fill. But theirs is the satisfaction of a job well done. We wish them luck and equal success in all their future undertakings.

A new year looms ahead, before the old has fairly passed. Plans are already under way for a new and different Engineer. We hope to make the Engineer, more than ever, a magazine of genuine interest to every student. Our aim is for closer contact with each department, in order to bind more securely, the "Confederated States" of the Engineer's Quad. We welcome your suggestions and criticism, and solicit your contributions.
